

ECP 19 Poster Awards

Poster presentations are an important and efficient means to exchange ideas and results at modern scientific conferences.

Since the 9th European Conference on Personality (ECP-9, Guilford, UK, 1998), the EAPP has the tradition to award poster presentations of high quality. The awards are offered to increase the importance, impact, and quality of the poster presentations.

The selection committee will be defined after closing the submission in order to avoid any conflict of interests.
